

LUGGERS 101

Brought to you by Natril Gear

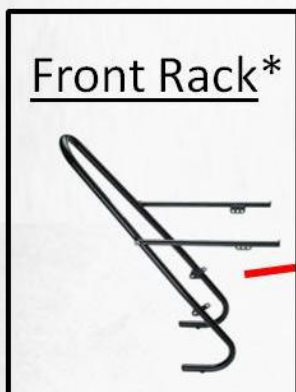

WHAT'S A LUGGER?

Think of luggers like saddlebags for a bicycle. They're used to haul stuff around (ex: riding your bike to commute to work, run errands, go out for a picnic lunch, etc..), and they are typically used in pairs. Luggers attach to a rack that goes over the front or back wheels of a bicycle. (You will need to purchase a rack separately.)

TO USE LUGGERS, YOU NEED A BIKE RACK. WHAT'S A BIKE RACK?

Bike Racks on a Bike

*There are many different kinds of bike racks, but they generally look like this.
